***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fell (GB 2 382 722 A).

Regarding claims 1 and 11, Fell (Figures 1-3) teaches a device comprising an antenna for receiving radio frequency signals comprising a first conductor for receiving the radio frequency signals and for converting the radio frequency signals into electromagnetic fields; and a second conductor for receiving at least a part of the electromagnetic fields and for converting the received electromagnetic fields into input signals, which the second conductor is different from the first conductor and is coupled to a radio frequency circuit for processing the input signals.

Regarding claim 12, the device of Fell would enable the method for receiving radio frequency signals comprising the steps as claimed.

***Allowable Subject Matter***

3. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 2, Fell discloses the claimed invention except mentioning that the radio frequency circuit comprises an antenna diversity unit having a first input coupled to the second conductor and a second input coupled to a third conductor of the antenna, the third conductor is different from the first and second conductors.

Claims 3-5 would have been found allowable for depending on claim 2.

Regarding claim 6, Fell discloses the claimed invention except mentioning that the radio frequency circuit is mounted on the first conductor.

Regarding claim 7, Fell discloses the claimed invention except mentioning that the first conductor is in the form of a plane having a first surface and the second conductor is in the form of a wire having a second surface smaller than the first surface.

Claims 8-10 would have been found allowable for depending on claim 7.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2002/0042257 A1 discloses a system for down-converting and up-converting electromagnetic signals.
